DATE: 1 February 1957

FROM : Acting Chief, Weapons and Ammunition Branch

SUBJECT: Monthly Report for January 1957

1. Accomplishments

a. Considerable research effort was expended on Project 10.1505, "Soviet Military Expenditures". This included a search for Soviet price information at the German Military Documents Section in Alexandria. In addition, I/WA ammunition estimates have been reevaluated by tying ammunition production to output of artillery and small arms. The results suggest that present ammo estimates may be too high.
